# WOODBOK

May – August 2021

HW3001 FENDI

# SPRING INTO SUMMER

The clocks have gone forward, and just like time, Havwoods does not stand still. The latest phase of our Wood Book journey sees the book metamorphosise to a new configuration we hope will allow us to present even more expertly the wonderful range of products available.

In this edition we also take the opportunity to introduce the concept of family, connecting our matching products in a more structured approach – showcasing the options available for some of our most popular finishes in all their available formats.

We also take the time to revisit one of our most iconic ranges, Relik, where every one of these reclaimed wonders has a story to tell. From the lagoons of Venice to the abandoned barns of the Midwest you can be sure you are truly walking upon history.

Lastly, in response to unprecedented demand, we have extended our range of Prime grade boards available from stock in the UK, celebrating the grain structure of the material without interruption from knots and sapwood.

We look forward to working with you as we transition to sunnier times ahead.

# 01 FEATURES

We always look to stay at the forefront of the industry and are constantly seeking new products, knowledge and trends we can share with our clients. Each edition features new and exciting insights that we hope you enjoy.

# DESIGNER SPOTLIGHT: RACHEL EATON (ADS DESIGN)

## **Tell us about yourself?**

Originally from the South West I studied (BA Hons) degree in Interior Design at Birmingham finishing with a 1st, started my first job in London in the luxury 4/5\*Hotel Interior design sector (Peter Inston and Richard Daniels Design). We renovated our first flat in Clapham and then moved to West Sussex as my husband is Medical, we have 2 children. We moved to Worcestershire and bought a tythe barn with an out-building which was derelict, this became a 3 year project to renovate and transform into a holiday let. I started working for ADS Design in Tewkesbury 14 years ago, I was lucky as they have similar Hotel projects as I had been involved with in London plus local country house Hotels which I have enjoyed working on. Our most recent move has been to a town house in Cheltenham which is a more manageable size as we are now empty nesters. It is the first time we have re-furbished a property from top to toe before moving in, which seems like a luxury but the project has been very challenging this year because of Covid with many delays.

## **How long have you worked as an Interior Designer?**

Since leaving Uni in 1993. The work involves technical drawing and detail designing on AutoCad, client presentation schemes and FF & E scheduling with the selection of 'loose' furniture and décor items.

## **What is your most recent project?**

At ADS Design we have just completed the Guestrooms and Public Areas including Meeting & Events at Elstree, this was previously a Holiday Inn and is now a Doubletree by Hilton, and with the same Client the Doubletree at Stoke on Trent.

## **How do you choose the right flooring for your project?**

We work closely with our clients so the flooring is in line with their hotel brand standards and specifications in terms of slip ratings and durability. We also choose wood flooring for our pub projects which are sometimes listed buildings so they are kept in context with the character and age of the property.

## **Why do you like working with Havwoods?**

Havwoods are always really helpful with our specifications, with some clients such as Hilton we produce detailed Control Books so we need a lot of technical information for each item. They also help with flooring samples for presentation boards which always arrive quickly and sometimes include a pack of sweets!

HW16602 NOTTE - CHEVRON

HW16602 NOTTE - CHEVRON

**You recently chose Havwoods flooring also for your own home, can you tell us about it?**

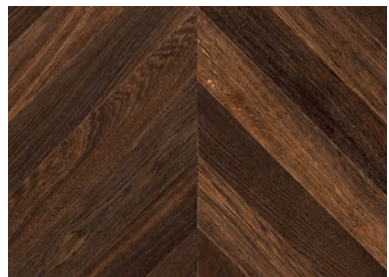

I saw the Italian Collection Oak Notte chevron in the Havwoods brochure and thought it would be perfect for the house. It has quite a lot of variation of tone in the wood and is brushed and fumed, the drawing room is east/west facing so has light from the large front sash window in the morning moving round to the back window in the afternoon, as the light changes

throughout the day it brings out all the lovely colours of the wood. I took it as a huge compliment when someone asked if the flooring was original to the house.

The house is a listed 1820 Regency period property and has all the character of an old house, the drawing room floor which had been carpeted was not at all level. The contractor used plyboard to form a rigid subfloor and then laid the tongue and groove Notte. It is an engineered board but only 10 mm thickness so it worked well with the existing doors, architraves and skirtings, and we were able to run it into a new tiled hallway floor.

## INTRODUCING V COLLECTION PRO

**LAUNCHED IN 2018 OUR V COLLECTION HAS BEEN HOME TO SOME OF OUR MOST COST-CONCIOUS PRODUCTS AND WE ARE DELIGHTED TO BE EXTENDING THE RANGE FURTHER WITH AN EXCITING INTRODUCTION... V COLLECTION PRO.**

Our new three-layer T&G selection offers a total of 15 new colour choices, all with a matt lacquered finish. We have options available in either 180mm or a wider 207mm plank perfect for glue down installation. All products are FSC® Certified (FSC-COO9500) and can be installed over underfloor heating.

Turn to pages 106-109 to see the fantastic colour options available and to request samples please call +44 (0)1524 737000 or visit our website: [havwoods.com/int/vpro](https://havwoods.com/int/vpro)

# PRIMETIME ORIGINALS

We are delighted to be extending our flagship Venture Plank range to include this exciting set of six new 192mm wide Prime grade boards. Offering the perfect canvas for your next luxury interior, these boards showcase the grain structure of the material without interruption from knots and sapwood.

# EVERY RELIK HAS A STORY

**A RELIC BY DEFINITION IS AN OBJECT SURVIVING FROM AN EARLIER TIME, ESPECIALLY ONE OF HISTORICAL INTEREST AND OUR RELIK COLLECTION IS THE EPITOME OF THIS MEANING. OUR RANGE OF GENUINE RECLAIMED PRODUCTS EACH HAVE THEIR OWN UNIQUE JOURNEY AND NO DOUBT MANY TALES TO TELL.**

Starting across the Atlantic in the vast plains of the American mid-west, our Barn Oak (RECM2120/RECM2122) began life as a literal building block in the creation of a nation. As migration continued at pace, barns were constructed by the local residents to house the incoming arrivals as the rural communities expanded.

Built wholly from local timber primarily transported by river, the barns served their original purpose until well into the 20th-century. However, over the years as the population left the countryside to head for the cities, these impressive structures became abandoned and disused and it was time for the materials themselves to also find a new home... and maybe in yours.

Of course it is not just North America where the stories can be found, formed from 100 small islands in the Adriatic Sea the beautiful and historic city of Venice provides the backdrop for a million selfies. With no roads, it is the canals that keep the city moving and you can't help but notice the rows of gondolas moored at the multitude of small wooden jetties.

These inconspicuous moorings lead a life of their own, and once they have completed their shift they are renewed in an endless maintenance cycle. Their journey does not end there, we take this discarded material and all it's battle scars and rejuvenate it into our Venetian Lagoon (RECM2075) product offering arguably the most unique surface you can within our collection.

Turn to pages 60-63 to see the full Relik range, to hear more about the stories they can tell then contact our team on +44 (0)1524 737000.

For more information visit our website: [havwoods.com/int/relik](https://havwoods.com/int/relik)

## SOMETIMES SIZE IS EVERYTHING

EVER WONDERED WHAT THE LIMITS ARE FOR ENGINEERED WOOD FLOORING? WELL AT HAVWOODS, THERE ARE NO LIMITS. TAKE A LOOK AT THESE COLOSSAL BOARDS, DIMENSIONS UP TO 60CM WIDE AND UP TO A MAMMOTH 14M IN LENGTH THESE TRULY ARE BREATH-TAKING.

Sawn from the entire length of a tree trunk these truly spectacular planks can offer wall to wall flooring with no end joints. The 4mm top layer of European Oak is secured to a 9/12mm core with a further 4mm balancing layer beneath.

## INSPIRATION

Be inspired from our ever-evolving portfolio of amazing projects featuring some of Havwoods most beautiful products. Use these shots as a guide to how our products may look in your project whatever the size or location and remember that both natural and artificial lighting play an important role in how your flooring comes to life.

# ALDGATE TOWER

## LONDON

**Architect:** Basha-Franklin  
**Designer:** QOB Interiors  
**Developer:** Brookfield Properties UK  
**Photographer:** Philip Durrant  
**Product Used:** HW2604 End Grain, Henley

ALDGATE TOWER, A HIGH-PROFILE OFFICE BUILDING IN THE CAPITAL, REQUIRED AN AESTHETIC WOOD FLOOR SOLUTION TO ENHANCE ITS GROUND FLOOR LOBBY. PART OF A WIDER RENOVATION, THE BRIEF WAS TO REVITALISE THE ENTRANCE SPACE TO CREATE AN INCLUSIVE YET INVITING ENVIRONMENT FOR OFFICE WORKERS AND GUESTS THAT MATCHED ITS VIBRANT SURROUNDINGS.

The 5,000 square foot ground floor, which should have been a social hub for interaction and collaboration, was under-utilised and lacking clear purpose therefore the re-fit was vital in order to attract prospective tenants and to support a range of typologies.

XVER

HW2604 END GRAIN

# ALD GATE TO

HW2604 END GRAIN

Selected for this project was End Grain Nature from Havwoods' Henley collection. A durable choice, the engineered European oak benefits from inherent natural texture, which only adds to the plank's unique visual appeal.

An ideal choice for a bustling lobby, the luxurious boards create a seamless flow across the ground floor, whilst also helping to zone the reception desks.

The perfect complement to this contemporary design scheme, Havwoods has contributed to creating a truly innovative office space that promotes social connection.

# STOCKWELL HOUSE

## LONDON

**Architect:** \_ing Architects  
**Designer:** Peter Lynn of \_ing Architects  
**Builder:** Extend  
**Photographer:** David Butler  
**Product Used:** Fendi Herringbone HW3001, Fendi 13 HW921 Venture Plank

### SET WITHIN THE BEAUTIFUL LANSDOWNE GARDEN CONSERVATION AREA IN THE HEART OF STOCKWELL, IS THIS IMPRESSIVE AND NEWLY REFURBISHED GEORGIAN, TERRACED HOUSE.

With a traditional aesthetic in mind, the brief was to open up the existing rooms and create a functional, spacious and classic home. Each room throughout the property embraces a dark monochrome colour palette that gives the house instant wow-factor.

Havwoods' Fendi board was chosen as the flooring solution for this project thanks to its high-class and luxurious finish yet modern traditional feel. The herringbone patterns flows beautifully throughout the lower and upper ground floors – delivering a beautiful sense of detail and cohesion. The matching Venture Plank from the Fendi range was used for the bedrooms and landings to help exude a calmer quality to the home whilst differentiating the areas in the property.

A full new kitchen was designed with striking marble and stone surfaces. The monochrome theme was carried through into the lower ground floor, with accents of brass and ironmongery to help lift and lighten the space. A mirrored drinks cabinet at the head of the dining room acts as a focal point whilst the bedroom helps ground the space and reflect the building's true heritage.

The home is further characterised by vibrant pops of yellow and green with botanical touches to pull the scheme together. The end result is a property that has been rejuvenated and brought back to life, to be enjoyed for decades to come.

HW3001

HW3001 FENDI

# BROADGATE, 1 FINSBURY AVENUE

## LONDON

**Architect:** Allford Hall Monaghan Morris ([www.ahmm.co.uk](http://www.ahmm.co.uk))  
**Developer:** British Land Storey  
**Photographer:** Gareth Gardener  
**Product Used:** HW9514 Marle, Henley

**1 FINSBURY AVENUE IS A GRADE II LISTED BUILDING CONSTRUCTED IN THE EARLY 1980S. AS THE FIRST BUILDING IN THE BROADGATE DEVELOPMENT, THIS STUNNING LISTED BUILDING WAS INSTRUMENTAL IN SETTING THE STANDARDS FOR OFFICE TYPOLOGY THROUGHOUT LONDON.**

Designed by Stirling Prize-winning architects AHMM, 1 Finsbury Avenue combines business and pleasure to create a unique and contemporary space for British Land and Storey customers, complete with colourful interiors and vivid pattern.

Brought to life by artist Morgan Myerscough, the atrium of this industrial-inspired interior provides an eye-catching focal point. Also home to the Butterscotch Bakery, the vibrant space required an intelligent wood floor solution that could withstand heavy traffic and complement the lively aesthetic.

Havwoods was selected to provide a wooden surface solution that would not only look good but would stand the test of time. Marle Rustic from the Henley collection was chosen for this project, the engineered oak boards offer a continuous flow, whilst the pre-finished texture adds character and depth.

A durable choice for an area exposed to heavy footfall, the planks benefit from anti-slip properties to deliver a faultless floor covering to this modern office space.

## GRADING & PATTERNS

When it comes to choosing your forever floor, the overall effect it is characterised not only by your choice of colour but also by the natural grade of the wood, the surface finishing technique and the pattern.

The type of pattern plays a leading part in the flooring portrait, so once you have decided on a colour scheme, use the following guide to help you choose your favourite; from the popular plank style, a more adventurous pattern such as Herringbone, Tumbling Dice or Chevron, or maybe something more dramatic like the design panels available in numerous designs and shades.

# MAKING THE GRADE

SINCE THERE IS NO INTERNATIONAL STANDARD FOR TIMBER GRADES, THESE ARE A GUIDE AS TO WHAT YOU MAY EXPECT. PLEASE DO REMEMBER THAT BOARDS ARE USUALLY SELECTED BY EYE AND THAT THESE PARAMETERS ARE SIMPLY A GUIDELINE.

## PRIME

Typically, prime grade has few, if any knots, and these will be of minimal size. There will also be a minimal amount of sapwood and filler, if any at all. The colour of the filler is intended to complement the natural structure of the wood, where features such as knots are in contrast to the surrounding timber, and it may vary from batch to batch. There will be a relatively small amount of colour variation in the timber itself.

## SELECT

Typically, this grade will have a mix of almost prime boards with other planks which have more knots of a limited size. Expect some variation in tone from heartwood and sapwood as well as small checks (cracks across the growth ring). There will be some filled elements, such as broken knots. The colour of the filler is intended to complement the natural structure of the wood, where features such as knots are in contrast to the surrounding timber, and it may vary from batch to batch.

## CLASSIC

Classic Grade floors show the natural variation of timber without allowing some of the more characterful features in more rustic grades. Planks with very few knots will be mixed with some planks containing larger knots or checks (cracks across the growth ring) which may be filled. Variation between tone from heartwood and sapwood can be expected but is controlled. The colour of the filler is intended to complement the natural structure of the wood, where features such as knots are in contrast to the surrounding timber, and it may vary from batch to batch.

## CHARACTER

Typically, character grade will include both heartwood and sapwood and allows a wider range of colour variation. Knots are larger and you should expect checks (cracks across the growth ring) and possibly some end shake (cracks between the rings). The colour of the filler is intended to complement the natural structure of the wood, where features such as knots are in contrast to the surrounding timber, and it may vary from batch to batch.

## NATURAL/RUSTIC

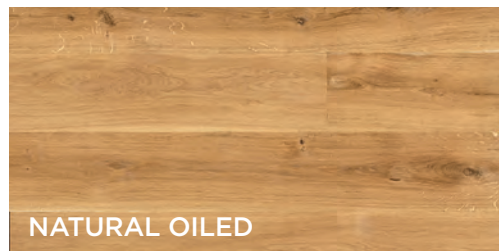

Known as either natural or rustic grade this allows a virtually limitless size and number of knots. Heartwood will be used, there will be colour variation, sapwood and filler; you should also expect checks (cracks across the growth ring) and possibly some end shake (cracks between the rings). The colour of the filler is intended to complement the natural structure of the wood, where features such as knots are in contrast to the surrounding timber, and it may vary from batch to batch.

# FINISHING TECHNIQUES AND CHARACTERISTICS

TO CREATE THE OUTSTANDING FINISHES WE OFFER,  
THE WOOD GOES THROUGH VARIOUS PROCESSES  
WHICH AFFECTS DIFFERENT TYPES OF WOOD IN  
DIFFERENT WAYS.

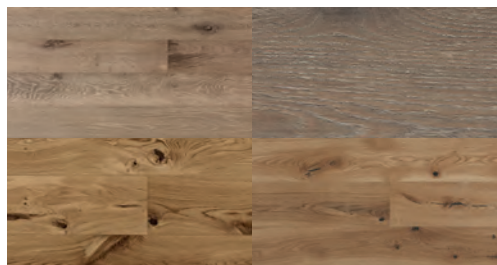

SOMETIMES COLOURED OILS ARE ADDED TO  
PRODUCE AN EVEN MORE INDIVIDUAL APPEARANCE.

## SAPWOOD

Sapwood is the living part of the tree through which water and sap flow. It is always lighter in colour than the heartwood and certain fuming, smoking and colouring processes emphasise the sapwood since it doesn't react to such treatments to the same degree. (The effect of these treatments on planks containing sapwood is shown left) By definition sapwood contains more moisture, however this is no cause for concern since all Havwoods' timber has been carefully dried and its stability is ensured when supplied in an engineered form.

## SOME CHARACTERISTICS OF WOOD ARE PURELY NATURAL AND THESE ARE EXPLAINED BELOW.

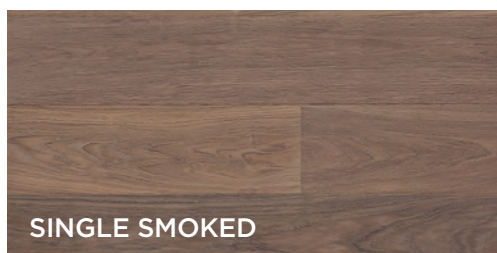

### KNOTS & FILLERS

A knot is either the base of a side branch or a dormant bud around which the grain flows. A knot is sometimes replaced by filler and this may be of various colours: white, grey, brown and black are shown here.

### MEDULLARY RAYS, CHECKS & SHAKES

These white, ribbon-like medullary rays are an indication that the plank has been crafted from quarter-sawn timber. Checks and shakes usually occur at the end of a board and may be cut off.

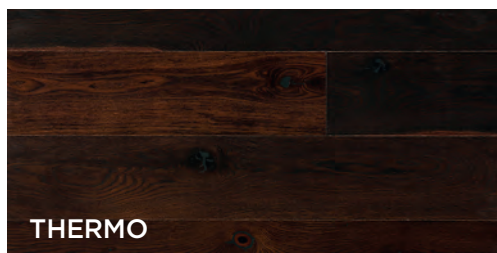

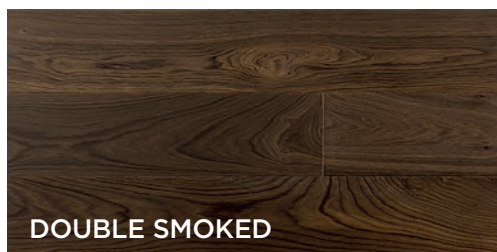

### SMOKING AND FIRING GRADES

Smoking and fuming are essentially the same and refer to a process whereby the hardwood is exposed to ammonia gas for 24 (single) or 48 (double) hours. The colouration is surface deep only.

**Unlike staining, smoking reacts to the chemical composition of the individual plank, so the ultimate shade will vary. This variation is considered an asset, however if you prefer a more even tone we suggest you consider choosing stained rather than smoked wood.**

Fired products are treated in a vacuum, sometimes for several weeks, and the dark colour runs throughout the lamella providing a genuine visual alternative to tropical hardwoods.

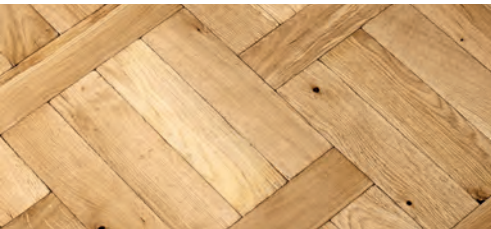

# PATTERNS

THERE ARE VARIOUS DIFFERENT TYPES OF DESIGNS OR PATTERNS AVAILABLE. STANDARD PLANK IS THE MOST COMMON STYLE BUT YOU MAY DECIDE ON SOMETHING MORE INTERESTING LIKE A BLOCK OR HERRINGBONE.

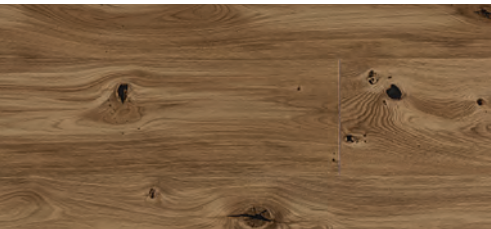

## HERRINGBONE

Solid blocks and larger engineered wood blocks means you can create many different sizes in this pattern. Herringbone blocks may be laid in single or double patterns, or if they are the correct proportion you will be able to produce patterns called 'Tumbling Dice' 'Basket weave' and 'Ladder' patterns.

## PLANK

This is sometimes known as plank, strip or boards and is available in many different lengths and widths.

## VERSAILLES

## GORD

---

## FINISHES

### LACQUERED

This is normally a polyurethane coating that covers the pores of the wood and forms a hard, resilient surface, protecting it from dirt and moisture ingress. A good quality lacquer will protect a wooden floor for anything from 12 months to 6 years, depending upon the amount of foot traffic.

### OILED

Oil penetrates deep into the wood and brings out the true beauty of both the color and grain, as well as providing protection for the floor. In addition to providing a natural look, oiled floors lend themselves to being spot repaired in the event of surface damage.

### UV CURED HARDWAX OIL

Combining the wear advantages of a lacquer with the subtlety of oil, this finish is micro-porous, water-repellent, dirt-, wear-, and stain-resistant against wine, beer, cola, coffee, tea, fruit juices and milk. It will not crack, flake, peel or blister.

# SUSTAINABILITY – THE ONLY WAY FORWARD

66

Meeting our present needs without compromising the ability of future generations to meet their own needs.

99

Sourcing materials from sustainably responsible sources has never been as important as it is today. All of us - as individuals as well as organisations - are responsible for the environment we live in, and all our actions influence the three elements of sustainability: economy, society and environment. Sustainability belongs to us all.

For us at Havwoods, sustainability is a matter of extreme importance. It affects everything that we do, and we are continuously taking new steps to improve our actions in this area. We do our utmost to ensure that our timber is ethically and sustainably sourced and work only with reputable timber companies. We require an independent certification to verify our timber sources, and this certification is available also for you to demonstrate to your clients that you have met their expectations for ethical trading.

We know that deforestation is having a huge impact on the environment – global warming, soil erosion, the loss of habitat for plants and animals, and the destruction of local populations and the water cycle, to name but a few factors. Helping local populations to preserve their forests is the task of international non-profit organisations like the **Forest Stewardship Council® (FSC®)**.

Another international organisation that you will find references to in our brochure is the PEFC, which stands for **Program of the Endorsement of Forest Certification**. Their focus is to ensure that certification is accessible even to small and family owned forests. **Cradle to Cradle Products Innovation Institute** addresses issues from a different angle; educating and empowering manufacturers to become a positive force for society and the environment.

# HAVSEAL™ RECOGNISES RESPONSIBLY SOURCED PRODUCTS

HavSeal™ is our own seal of approval taking even further measures ensuring sustainable and responsible procurement within our supply chain. The HavSeal seal of approval is awarded to those products that exceed the already high standards needed to ensure entry into our portfolio. Not only do we consider the origin, the legality and sustainability of each of the products, but we also take into account the energy that goes into production of the product, the chemical content of the product as well as the mill's commitment to re-using its waste.

**The Green Seal** award is given to the products that offer extra international accreditation, identified as coming from sources that offer higher standards of energy use and waste generation.

**The Gold Seal** is awarded to the products coming from mills that show an extreme passion and proactive approach to ecological benefits such as reusable heating for local communities, the powering of wind turbines, financing the re-introduction of animals into the forest areas and commitments to replanting forest and woodland areas such as the Forest Stewardship Council®, FSC®.

66

As the market presents a growing demand for eco-friendly products we wanted to add our own stamp of approval on certain products in our portfolio. HavSeal enhances the profile of each product giving even more product information for our clients. It also offers better insights into how we bring products to the marketplace

## COLLECTIONS

HENLEY

## HENLEY

The stunning Henley collection is best described as a pre-finished plank with texture. This collection offers a high-performance, superior-quality oiled surface. It is an excellent choice for high footfall areas and for those exposed to heavy-duty use. The textured surface of Henley ensures that any superficial scratches and marks are naturally disguised without distracting from the floor's original aesthetic.

Sawing, brushing, burning and planing techniques are applied to the Henley wood flooring to add character. At the same time every Henley product is tested to ensure that the processes involved to create these textures do not weaken the structure of the wood itself. Henley features plank, herringbone and design panels with the traditional tongue and groove fit profile plus our exciting textured click-system offering.

RELIK

## RELIK

Havwoods' Relik reclaimed wood flooring adds character and atmosphere to your interior. Relik is a collection of solid and engineered planks and blocks, translating the beauty of reclaimed timber to a superior wood flooring product.

Proudly displaying the rich patina of its past, each design in the range has a story. Sourced from a completely authentic origin, Havwoods' genuine reclaimed wood starts life in all corners of the globe, salvaged from age-old wooden structures and lovingly hand-repaired and restored by skilled craftsmen. The product is then planed, profiled and sanded by using twenty-first century production techniques resulting in a hardwearing and multifaceted plank that will bring luxurious character to any interior.

The Relik flooring can be used on floors, walls, ceiling, doors, furniture and even lighting, across any designs from private residences to commercial setting.

PUREPLANK

## PUREPLANK

PurePlank is an affordable FSC®(FSC-C009500) certified engineered plank. The boards in this range include both 14mm and 9mm thickness, and the diversity in finishes in this superior collection lends itself to a breadth of applications from single residences to the largest multi-residential complex. The product's triple layered engineered construction involves a solid oak surface bonded to two layers of softwood ensures stability and all-round performance.

A variety of widths and finishes are available including UV oil coating, which provides a hardwearing surface that also enhances the wood's natural characteristics. The engineered construction of the PurePlank range ensures that the product can be fitted over an underfloor heating. The Havwoods click-fit system makes the installation of PurePlank exceptionally fast, which is a huge advantage in any large-scale projects.

HW2108 CANTON

## FLOORSCORE

FloorScore® is the most recognized indoor air quality (IAQ) certification standard for hard surface flooring materials, adhesives, and underlay. Developed by SCS with the Resilient Floor Covering Institute (RFCI), a leading industry trade association of flooring manufacturers and suppliers, it qualifies for many green building schemes including LEED v4, WELL, BREEAM, and CHPS.

We are proud to share that our Pureplank collection is fully FloorScore accredited.

## 130MM 1-STRIP PATTERN

Just in case you are looking for a narrower option, then we also have you covered.

# VENTURE PLANK

## VENTURE PLANK

Venture Plank is a high-quality performance engineered timber board characterised by a comprehensive spectrum of interesting shades and a smooth finish.

The two-layered construction of Venture Plank comprises of a hardwood surface backed by a superior quality birch ply to ensure a greater level of stability. This construction guarantees a durable and sturdy floorcovering suitable for both residential and commercial applications. Venture Plank can also be used with Havwoods' Magna raised access flooring system, and all of the products are suitable for installation over underfloor heating.

Whilst lacquered and unfinished boards are included in the collection most of them are oiled. The new, ultra-tough Valour oiled finish is available in this range while others utilise a fourth generation UV cured Hardwax Oil. Both finishes provide exceptional durability whilst maintaining the natural appearance of wood.

Venture Plank has a traditional tongue and groove fit profile with a bevelled edge. All Valour finished Venture Plank boards are FSC® (FSC-C009500) certified timber.

# VENTURE PLANK PRISTINE PRIME

These 192mm wide prime grade boards celebrate the natural tone of wood without interruption from knots or sapwood to create a more uniform surface.

Grade	Rustic

# VENTURE PLANK UNFINISHED

Our carefully selected collection of unfinished Venture Plank products may require additional sanding before applying the final chosen finish on site. Your choice of finish, whether it be lacquered or oiled, natural or coloured, may alter the appearance of the finished product, so we always recommend trying a small area before completing the full floor.

# THE ITALIAN COLLECTION

## THE ITALIAN COLLECTION

Inspired by the intricate floors of Italy, the highly popular Italian Collection comprises of chevron, herringbone and plank style boards available in a vast spectrum of shades. These highly consistent engineered boards come with two layers: a surface of select grade slow-grown European oak accounting for over one third of the overall depth, and a spruce or birch ply.

All boards feature a traditional tongue and groove profile and are surfaced with a lacquer or oiled finish. The herringbone and chevron blocks are supplied with a groove on two sides and tongue on two and are handed. They will be supplied in the correct ratio. The entire collection includes FSC (FSC-C009500) certified timber.

#### ALABASTRO - PLANK

# BESPOKE & SPECIAL ORDERS

## BESPOKE & SPECIAL ORDERS

With Havwoods Bespoke and Special Orders we can turn your ideas into realistic propositions. We can offer you a solution for your required pattern, delivering essentially a finished panel in an engineered construction. This is significantly quicker and far more practical way to do it saving you a lot of time and ensuring an excellent finish as the end product is achieved in a controlled factory environment.

Please contact us to find out how we can help you with your bespoke and special order requirements.

# WHEN STANDARD PRODUCTS WON'T DO

**SOMETIMES YOUR REQUIREMENTS CANNOT BE FILLED BY OUR STANDARD PRODUCTS. WHILE OUR RANGE IS EXTENSIVE, WE AT THE SAME TIME UNDERSTAND THAT AT TIMES YOU NEED SOMETHING MORE. WE ARE PROUD TO BE ABLE TO FULFIL YOUR BESPOKE WOOD FLOORING REQUIREMENTS.**

You can have your ideal floor of any size, colour or pattern. You may start with one of our standard products or even an external option that is giving you the overall look you are after. Our team can then work with you to refine the primary characteristics of the product to meet your exact needs.

**We may be able to modify:**

- Width or length of the planks
- Thickness of the product to meet desired build-up
- Grading of the top layer
- Certification requirements
- Specific patterns or matching planks
- Custom design panels
- Surface texture and finish
- Colour and shade

## MAKING THE GRADE

When you are planning on installing a product on both the floors and ceilings of your Miami Beach Villa, you need the product to be perfect for you. Our customer chose our popular but rustic grade Alcazar from our Venture Plank range, and opted for a prime grade with a stunning result!

## AWARD-WINNING VALOUR

This workspace customer in London was looking to add extra resilience to the flooring in their new offices. They decided to go with our highly durable Valour UV Oiled finish added to their chosen colour and surface. Valour is perfect for any space with a high footfall.

## OVERSIZED CHEVRON OR HERRINGBONE

Both chevron and herringbone patterns offer a beautiful and eye catching design, but if you want to exaggerate that look even further then a special-order oversized chevron or herringbone can do just that. With either wider or longer blocks you will surely stand out from the crowd!

## BESPOKE PATTERNS, PANELS AND DESIGNS

If you would like to opt for something truly unique then we can make the pattern of your dreams a reality. No matter the shape or complexity of design we will work with you to deliver a practical, yet impactful wood flooring solution.

If your project requires additional levels of accreditation then this is something, we can offer too on many of our products including FSC® (FSC-C009500), PEFC™ (PEFC/16-37-1417) or Cradle-to-Cradle Certified™ products.

Discuss your requirements with us:  
[info.int@havwoods.com](mailto:info.int@havwoods.com) | +44(0)1524 737000

## DESIGN WITHOUT LIMITATIONS

Ever wanted to combine wood with other materials such as stone or marble? Or perhaps metal? Our full bespoke services enable you to do just that. Whatever your design requires it is very likely that we will be able to help. Working with producers around the world we can make even the most complex designs to come alive.

## HAND GRADE COLLECTION

**LUXURIOUS AND PRESTIGIOUS ARE THE BEST TERMS TO DESCRIBE OUR SUPERB HAND GRADE COLLECTION. WITH PLANKS OF UP TO 4 METERS LONG AND ALMOST 0.5 METERS WIDE, THIS COLLECTION TRULY OFFERS SOMETHING UNIQUE. AVAILABLE IN SENSATIONAL SHADES.**

**HAND GRADE PRODUCTS ARE CRADLE TO CRADLE (BRONZE) AND FSC® CERTIFIED, AND WHAT'S MORE THE ENTIRE COLLECTION IS SUITABLE FOR USE OVER UNDERFLOOR HEATING.**

Hand Grade is a luxury, high quality, high performance, pre-finished engineered board of triple layered construction, within a nominal 6mm wear layer of European Oak, 23mm birch ply core and European Oak base.

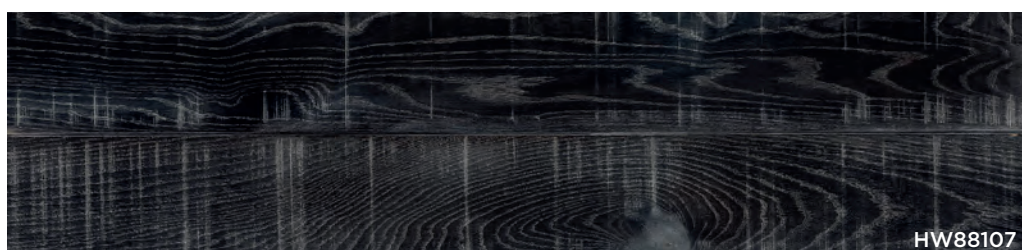

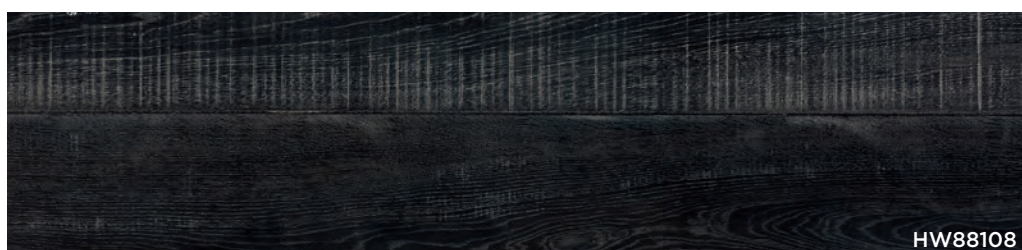

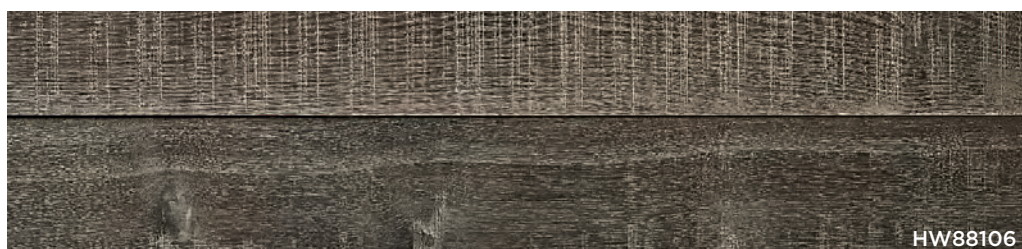

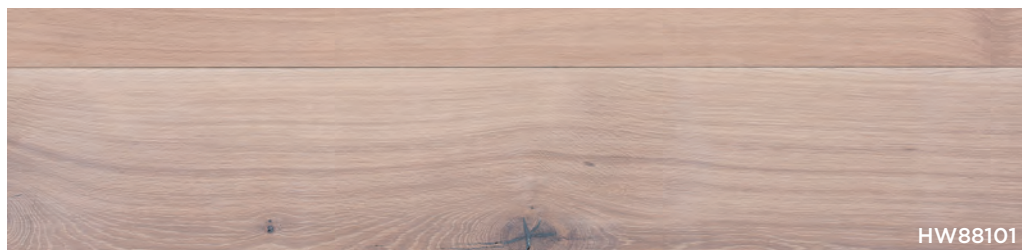

This stunning collection of boards and finishes needs to be seen to be believed, so we recommend that you discuss it first with one of our Showroom Consultants in a personal consultation. We will explain the careful selection process and take you through it in detail, looking at all available options for finish and colour.

After this we will arrange samples sent to you, and once you have made your choice and approved the sample, we will then use your choice of sample for quality control throughout the production process. This process adds quality to the selection process of this prestigious flooring.

## BESPOKE & SPECIAL ORDERS

MAGNA<sup>®</sup>

## MAGNA®

Magna raised access flooring is the perfect solution for workspace and other commercial areas where there's a requirement to access the underfloor services.

Magna flooring reduces downtime for refurbishments and is significantly faster and easier to install than using glue or underlay. The flooring can be sanded and maintained just like any other Havwoods' flooring. Individual planks or entire areas can be removed and replaced exceptionally easily thanks to the magnetised system which carries a lifetime guarantee.

# MAGNA®

## THE RAISED ACCESS WOOD FLOORING SOLUTION

The latest innovation in raised-access flooring, Magna's magnetic fit system offers a versatile solution for installation in commercial workspace, providing accessibility to underfloor services that cannot otherwise be installed in wall cavities.

Magna's magnetised and foam-sealed wood boards provide a secure connection to the supporting structural pedestals, which can be conveniently disconnected using a suction lifter to allow for maintenance and repair of the concealed services.

- Magnetic backed timber flooring
- Full access to your underfloor services
- Fast and easy removal of boards
- Herringbone pattern also now available

**Core products shown, over 200+ available!**

PUREPANEL

HW31016 ASPEN RAW

## PUREPANEL

PurePanel® really is perfect for designers, architects and joiners who wish to create bold and stylish in both commercial and residential applications. Our PurePanel boards are incredibly versatile and are supplied pre-finished and ready to use, offering huge time and cost savings, whilst still offering the distinctive look and feel only available from real wood. Coloured to match some of our most popular finishes, the mix-matching technique and industrial processing of PurePanel® also guarantees consistent colours and quality.

# PUREPANEL® FROM HAVWOODS

## KEY FEATURES AND BENEFITS:

- Endless opportunities across a multitude of applications.
- Seven of Havwoods' most popular on-trend colours, six in oak and one in walnut.
- Mix-match production technique ensures each panel is consistent in colour and quality.
- Panels are supplied ready to use and require no additional finishing on-site.
- Our pre-finished panels make installation and fabrication effortless.

VERTICAL

HRC1905 NOTUS

## VERTICAL

Translate the impact of wood to vertical surfaces with our collection of solid and engineered cladding boards. Milled to twenty-first century tolerances, the result is a board that is effortlessly easy to install and designed to create a feature in any space. Customers will require a suitable finish to complement these products to enable a suitable level of fire resistance under British Building regulations. Please ask staff for further details. All vertical surfaces need a suitable finishing product applied to attain the required building regulation standards.

# CALAIS

## HRC3005

Calais is a diamond-shaped tile with sides of 25cm length. A clear linear scratch gives elegance and a delicate chiaroscuro on the wall. It can be arranged both vertically and horizontally, but also parallel to one of the sides of the body or in a mixed system. In each of the arrangements it gives the interior originality and warmth. The wall gives the impression of a soft, pleasant surface.

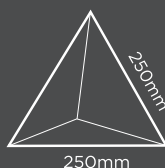

Thickness	30mm
Construction	Engineered wood
Wood type	Oak
Finish	Oil Matte

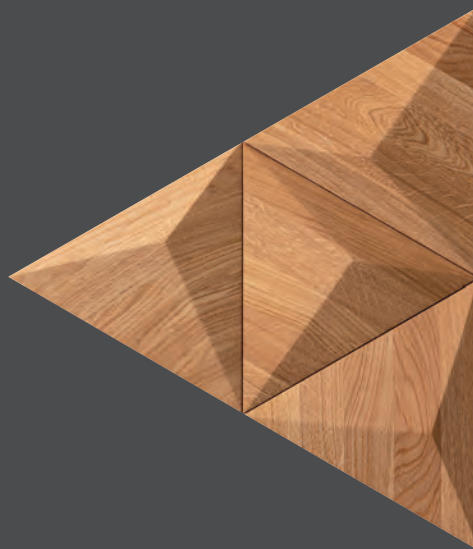

# CHIONE

## HRC3000

Chione is a triangle-shaped plate with sides of 25cm length. This is a 3-dimensional form in the shape of a conical, irregular tetrahedron. Due to the lack of symmetry the plate can be laid in many different ways. The geometric shape makes it ideal for modern interiors. Each wall casts a shadow at various angles.

Thickness	25mm
Construction	Engineered wood
Wood type	Oak
Finish	Oil Matte

VERTICAL

## PROFILE

Matching profiles will add the right finishing touch and a luxurious look to your project. Havwoods' range of T and end sections, ramps and stair nosing are specially produced to complement the entire flooring collection. In addition to this a flush nosing is available for the Pureplank collection.

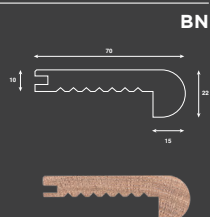

The hardwood profiles are not simply stained to suit but textured, oiled and white oiled where appropriate. They are indeed produced to match the selected flooring as closely as possible. All profiles are also available unfinished or prefinished with a light oak lacquer.
